

TURNKEY DATASET

Ready-made Security,
Work Flow Setup & Web

SHARPENyour**TOOLS**

 **lucity**TM**act16**

USE THE TURNKEY!

- ...it's a fully-functioning client configuration comprising:
 - **Security** – comprehensive group setup
 - **Work Flow Setup** (WFS) work codes, and
 - **LucityWeb** – functioning Dashboards & Views built-in.

TURNKEY DATASET

So much effort goes into setting up the basics in Lucy that we've developed a 'turnkey' dataset to provide a solid starting point for newcomers. It may also be of interest to existing clients who could benefit from a simplified Security setup or a re-working of their Work Flow Setup (WFS) codes.

Three core elements can be adopted wholly or in part:

1. Lucy Security:

Best practices in Lucy Security – especially given the additional security needs for Lucy Web

2. Work Flow Setup (WFS) work codes

Demonstration WFS codes – an amalgamation of good examples from existing clients

3. Demonstration Dashboard

a simple 'starter' dashboard for new clients

HOW TO CHOOSE IT

HOW TO USE IT

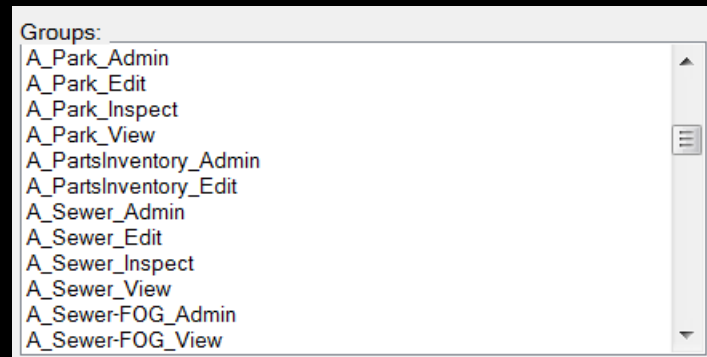

- It's ready to restore from DB backups in whole or in part:
 1. Security, Work Flow Setup & Web
 2. Security, Work Flow Setup
 3. Security alone
- Plus there are component 'data loaders' allowing manipulation of Security & WFS source data and the means to load it.

COMPREHENSIVE SECURITY CONFIGURATION

- **Admin_Security** – all five 'Admin' permissions:
 - Activations, Data Quality, Lucity App Admin, Lucity IT Admin, Security Admin
- **User_LucityWeb**
- **User_Mobile**
- **'A' Asset permissions**, for instance:
 - A_Sewer_View
 - A_Sewer_Inspect
 - A_Sewer_Edit
 - A_Sewer_Admin
- **'D' Department permissions**:
 - D_SewerCollections, D_Storm – links department's dashboards
- **'W' Work permissions**:
 - Standard WO_View, WPM_Edit, etc...
 - W-RES_Admin, W-View_Cost: special functionality detailed below.

WORK FLOW SETUP (WFS) – FULLY CODED

- The goal of the WFS in turnkey is to...
 1. provide a good base from which to modify the work codes
 2. Demonstrate various philosophies in work code configuration

LUCITYWEB OUT-OF-THE-BOX

- Fully functioning Web setup with Dashboards for several departments. The goal of the various configurations are to...
 1. Provide immediate access to most commonly-used modules in LucityWeb
 2. Provide sample configurations to demonstrate various means of managing thing

THANKS FOR ATTENDING!
